

# PAIN MANAGEMENT AND ASSESSMENT

Dr. Roneet Lev, MD FACEP

---

INSERT DATE, 2016  
EVENT NAME

# Learning Objectives

- Identify various **methods** of treatment of pain
- Understand the **dangers** of concurrent opioid and benzodiazepine prescribing
- Be encouraged to sign up and use **CURES** on a regular basis
- Identify when **naloxone** prescription should be considered
- Have knowledge of the 12 **CDC guidelines** for opioid treatment

# Patient Involvement in Pain Management

“Pain management is an important component of **patient centered care**. Patients should expect that their health care providers will **involve** them in their assessment and management of pain.”

Joint Commission Perspective, November 2014, Volume 24, Issue 11
